

Pocket Cable Toner

Applications

This pocket toner is designed for the professional installer to help troubleshoot cable problems with a simple, easy to carry tool for everyday use. This tool is designed specifically for use with Vericom RF cable applications.

Description / Specifications

This pocket cable toner features one port for the cable lead and an audible sounder for tone verification. This tool tones out the circuit and has an LED visual indicator for indicating a good or bad connection.

Ordering Information

Pocket Cable Toner	
Item Number	Packaging
BRCXT-03639	Sold Individually

How To Use:

(Testing a Coax Signal Connection)

1. To check your connection, use an F-81 barrel connector to connect the coax cable to the termination tool.

2. Once they are connected, a red LED will light up to let you know if your connection is good

Features & Benefits

- Checks circuit integrity in new and installed cable
- Quick and easy continuity checks, even in systems with large cable clusters
- Right angle male push on connector permits working in tight areas
- An audio tone identifies line carrying signal
- LED light indicates DC shorts, splitters and other self-grounding devices in cable
- Rugged all-metal construction for reliability
- Packaging: Sold Individually
