

LED Rechargeable Lithium-Ion Headlamp

Applications

This LED Rechargeable Lithium-Ion Headlamp is ideal for situations where you need lighting in a hands free situation, including cable installation, construction, attics, crawl spaces, household projects, camping or emergency lighting.

Description / Specifications

The Vericom Rechargeable Lithium-Ion Headlamp utilizes a 10 Watt, CREE XM-L2 LED and produces 1800 Lumens. The sleek, water-resistant, built-in rechargeable Lithium ion battery keeps any construction site, crawl space, or related area illuminated up to 3 hours and is completely recharged in 5 hours. The battery pack is composed of an aircraft-precision aluminum that features an anti-abrasive finish for years of use.
